

Status [Project]

Field Definition

The following table provides the definition for Project Status.

Field Name	Description
Project Satus	This indicates the status of the project. Project status can be used to control what processing is allowed at various stages of a project.

List of Values

The following table provides definitions for the values for the Project Status field.

Value	Description
Approved	All components necessary in Oracle are entered (e.g., project, award, funding, budget). This status allows user to create new transactions, adjust transactions, generate revenue, and generate invoices.
Closed	Project and related tasks are closed in Oracle. This status does not allow user to create new transactions, adjust transactions, generate revenue, or generate invoices.
Pending Closed	This status allows user to generate revenue and invoices but not create new transactions or adjust transactions.
Rejected	This indicates that the project will not be funded. This status does not allow user to create new transactions, adjust transactions, generate revenue, or generate invoices.
Submitted	This status does not allow user to create new transactions, adjust transactions, generate revenue, or generate invoices.
Unapproved	This status does not allow user to create new transactions, adjust transactions, generate revenue, or generate invoices.
