

**SUNY TECHNOLOGY ACCELERATOR FUND
2019 MOST VALUABLE PITCH COMPETITION**

**Frequently Asked Questions (FAQs)
As of 8/22/2019**

1Q: My team has a concern about the time requirement of this competition. It says that the commercialization milestones have to be achieved within 6 months. But we are developing a tool that needs to go through clinical trial and FDA approval, which will take a longer time. How will this affect our participation?

1A: Focus the proposal on shorter-term milestones that you can achieve with the \$50K. Here are some examples of potential short-term milestone that could be achievable in six months: purchasing equipment to enable you to conduct in vivo or in vitro studies, the completion of in vitro studies, purchasing animals to conduct and conducting a small animal study, and so on.
