Oracle Incident Information

The Research Foundation for SUNY is actively investigating the zero-day vulnerability Oracle identified in its software application, Oracle eBusiness Suite. Upon learning of the vulnerability, we took the application offline out of an abundance of caution and launched an investigation with assistance from cybersecurity experts. We have applied all available patches to the Oracle eBusiness Suite application and have received third-party validation that it is secure to resume using. In addition, we notified law enforcement and are supporting their ongoing investigation. If it is determined that this incident triggers notification obligations, we will provide notices in accordance with applicable law. We are taking appropriate measures to address this situation and will provide updates when more information is available.
