Thank you for your continued support as we continue to enhance the RF Report Center to provide a robust analytical tool for the user community.

Report Center Tip and Tricks

Graph Enhancements for Report Center

In this new upgraded version graphs have been enhanced to allow the end user the ability to sort graph views by using a context menu (right-click). A new sort dialog is displayed when you right-click in a graph view in the analysis editor, Results tab. You can right-click legend, data marker, and group-level (X axis) items to display a menu of interactions that includes options such as Sort and Drill. We have provided screen shots and an example below.

The sort dialog is displayed when you right-click in a graph view. Choose the column you would like to sort by. We choose Month End.
